

Vision Lux

Company profile

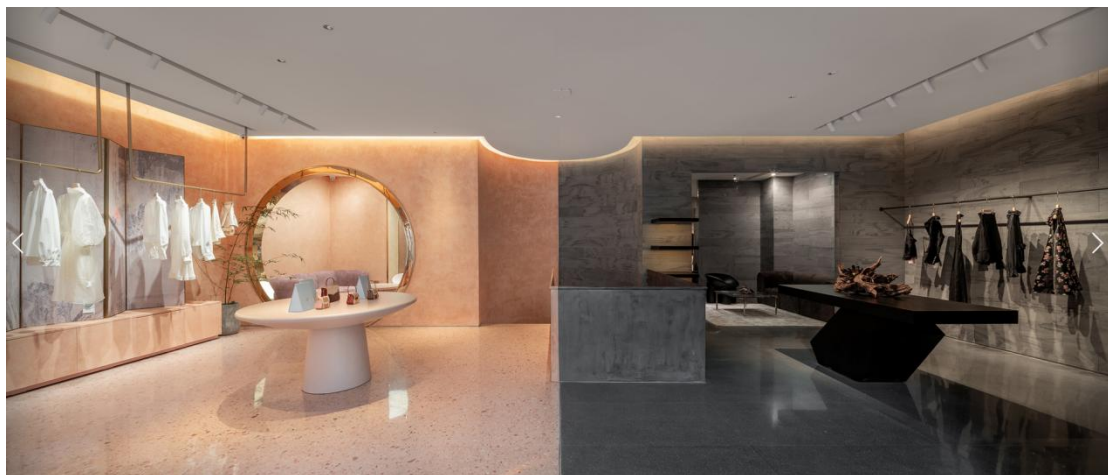

Vision Lux focused on developing and manufacturing technical LED-lighting products, with good quality as well as high efficiency, and competitive price/performance.

Each product we only cooperate with one partner in one area. By this we can protect customer's market.

History

Since 2014, the factory set up for domestic projects, mainly for retail, hospitality and architectural areas. The customers are from Shanghai and Hangzhou. Their requirement of product quality is high, and the design meets the newest trend of LED lighting industry. After several years of development, our products are in line with international standards.

Then we started to attend GuangZhou international lighting exhibition from 2018.

Not only Chinese customers like our products, but also foreign customers started paying attention to our products.

From 2019 we started business with foreign customers, in Germany, Italy and Australia we have partners who can get our unique design products and most competitive price.

In 2021 a strong team was formed for international business. We set up a product range, to choose the best quality, newest design and most competitive products mainly sell to international customers. Meanwhile, we keep studying the latest trend of lighting industry, and keep developing more and more new products.

Then we gave these products a name: ***Vision Lux***

Vision

Our Vision is to study deeply in lighting industry, to create something different, unique and popular in the market. And these products can support our customers to win the market.

Our Vision is to provide the best service to our customers. The customers is not only business partner, but also best friend, family.

Looking to the future, we want to be one of the most professional manufacturer in lighting industry. We believe we can!
